Note – For building a RESTful Web Services, we need to add the Spring Boot Starter Web dependency into the build configuration file.

Spring Boot - Building RESTful Web Services - Tutorialspoint

In case you don't have the option to use Spring Boot, just navigate to the second part of this post for using traditional way to of Building Restful Web Services with Spring. 1. Build Restful Web Services using Spring Boot. There are multiple ways of creating REST services using Spring Boot. Here are the different options.

Building Restful Web Services | Java Development Journal

In Spring's approach to building RESTful web services, HTTP requests are handled by a controller. These components are identified by the `@RestController` annotation, and the `GreetingController` shown in the following listing (from `src/main/java/com/example/restservice/GreetingController.java`) handles GET requests for `/greeting` by returning a new instance of the `Greeting` class:

Getting Started | Building a RESTful Web Service

Building RESTful Web Services with JAX-RS This chapter describes the REST architecture, RESTful web services, and the Java API for RESTful Web Services (JAX-RS, defined in JSR 311). Jersey, the reference implementation of JAX-RS, implements support for the annotations defined in JSR 311, making it easy for developers to build RESTful web ...
