chapter 39 ap objectives. 1. Compare the growth of a plant in darkness (etiolation) to the characteristics of greening (de-etiolation). 2. Describe the signal pathways associated with de-etiolation. 3. Describe the role of second messengers in the process of de-etiolation. 4.

chapter 39 ap objectives - BIOLOGY JUNCTION

Chapter 39: Plant Responses to Internal and External Signals 1. What causes a shriveled potato to grow skinny, pale sprouts? Morphological adaptations for growing in darkness, collectively referred to as etiolation, make sense if we consider that a young potato plant in nature usually encounters continuous darkness when sprouting underground.
