For reporting and correlation of events on a Firepower Management Center (FMC), you may find the following two documents useful:
Working with Reports;
Correlation and Compliance Events . If the events are generated by the Advanced Malware

Download Free Cisco Firepower Management Protection (AMP)

system, then you can find some directions from this document as well. Depending on your support entitlement level, you may get direct assistance from the Cisco TAC for false positive analysis.

FMC Reporting - Cisco Community

Yes - each ASA
FirePOWER module
requires a unique

Download Free Cisco Firepower Management

address and must be individually registered to the managing FMC (and license applied from FMC). Remember the FirePOWER modules themselves have no knowledge of the ASA HA pair. We can then logically put them in a device group and, when creating policy, assign both modules to the same policy.

Solved: Firepower
