Door Hardware Function - archtoolbox.com

When shopping for door hardware, here's some basic information you need to know. Make sure the hardware will work with your door thickness. A thickness of 1 3/8 inches is standard for interior doors, while 1 3/4 inches is standard for exterior doors. Note the hardware's required bore hole size: the diameter of the hole in the door.

ANSI/BHMA Lock Function

Reference <http://www.lockreference>

Standardizing Lock Functions. The 'function' or mechanical behavior of a lock, especially a mortise or cylindrical lever lock, should be specified for an opening. These are classified into more than 20 types, using codes developed by door hardware group BHMA. The relevant standard defining locks functions depends on the type of lock it is:

Understanding The 20+ Lock Functions

Outside Inside Series/Function Type ANSI No. Function Description CL3375
Corridor/ Dormitory Lock F90 • Throw-off latchbolt by lever either side except when pushbutton or key locks outside lever. • Pushbutton released by turning inside lever or by closing door. • Depressed pushbutton indicates door is locked.

and Architectural Door ...

ANSI/BHMA standards set forth different product grades for door hardware products. These product grades are defined by progressive levels of performance benchmarks in each applicable standard. The purpose of each is to help identify the quality and durability of locksets through a series of operational and security tests.

ANSI Grading

F14 STORE DOOR LOCK: Latch bolt by knobs. Dead bolt by key from either side. F15 HOTEL/MOTEL LOCK: Deadlocking latch bolt by inside knob or key outside. Outside knob rigid. Dead bolt by turn inside or emergency key outside. Projecting dead bolt disp lays occupancy indicator and shuts out all keys except emergency.
