### **Mercedes Truck Engine Problems**

I have a 2005 Freightliner Columbia with Mercedes MBE 4000 engine. This truck has been nothing but problems from day one. At 290K the coolant started to leak from head gaskets, so the dealer replaced liners, pistons and head gaskets under warranty. Now at 415K, just 15K out of warranty, the same problem is happening.

1) Early models (pre-63 plate) had water ingress via the wiring looms, which tracked down inside and damaged ECUs. There is a fix now, but it is worth checking that it's been done. 2) TCM module (gearbox control) leaks air on Euro-5 and early Euro-6 models. Again, check for replacement - a major VOR failure.

We have three Freightliners with the Mercedes engines (430hp). They are very economical on fuel but under powered. We also run quite a few other trucks and they all have the C-15 Cat. The Cat engine will not get the mileage but have a lot more torque. The young guys I have driving for us hate the Mercedes because of the torque issues.

I wouldn't own the Mercedes because it does not hold up. I owned a 2001 ISX, which was built after the first couple of years had problems that Cummins corrected. It was a great engine, but few shops will work on it but Cummins. I think if I was going to do oil field work I'd get a truck with a Cummins N-14.
